U. S. Patent and Trademark Office PTO-326 (Rev. 9-97)

Art Unit: 3764

DETAILED ACTION

Claim Rejections - 35 U.S.C. § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-6, 8-14 and 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sheehan.

Sheehan discloses in figures 1-5 a wound closure comprising a pressure sensitive adhesive 40, opposing elastomeric end portions (12, 14 the ends are made of polyurethane), a bridging portion 16, (the bridge portion stretches less than the end portions because it can be made of aluminum), an elastomeric back 50 and a reinforcing layer 30 that is a polymeric film. However, Sheehan does not disclose the wound closure having the same stretching properties recited in the claims. It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the wound closure as disclosed by Sheehan could be fabricated to stretch the same percentage recited in the claims and recovery from stretching the same percentages recited in the claims in order to use the wound closure to close a wound. Also the stretching and recovery percentages do not provide any novelty or criticality over the prior art.

Ù

Art Unit: 3764

3. Claims 7 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sheehan in view of Wiemken.

Sheehan discloses in figures 1-5 a wound closure, substantially as claimed. However, Sheehan does not disclose the end portions having unequal lengths. Wiemken teaches in figures 1-2 a bandage comprising ends portions (4, 6), wherein the second end portion (6) is longer than the first end portion. It would have been obvious to having ordinary skill in the art at the time that the invention was made that the wound closure as disclosed by Sheehan could be fabricated with one end longer than the other end as taught by Wiemken in order to use the longer end to provide additional adhesion.

4. Claims 19-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sheehan in view of Wiemken, along with Blackford.

Sheehan discloses in figures 1-5 a wound closure, substantially as claimed. However, Sheehan does not disclose the wound bridge portion having a width less than the end portions or the end portions having unequal lengths. Wiemken teaches in figures 1-2 a bandage having end portions with unequal lengths. Blackford teaches in figure 2 a wound closure comprising wound bridge portion 3 having a width less than the end portions 2. It would have been obvious to one having ordinary skill in the art at the time that the invention was made that the wound bridge portion as disclosed by Sheehan could be fabricated with a width that is less than the width of the end portions as taught by Blackford. The unequal length end portion would provide additional adhesion. The bridge portion having a width less than the end portions would allow access (air or

Application/Control Number: 09/671129

Art Unit: 3764

medication) to the wound. The stretching and recovering of the material is inherent of an

elastomeric material.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure. James discloses an interlocking suture. Although this reference is pertinent prior art, it

was not used to reject any claims, in the first office action.

6. Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Michael Brown whose telephone number is (703) 308-2682.
